

Standard Diver Equipment

At a minimum what every diver should carry on every dive:

1. Fins, mask and snorkel (A snorkel should be worn or carried on every dive. However, if you are properly trained to enter wrecks or other overhead environments, it should be carried but not worn when in the overhead environment.)
2. Compressed gas cylinder and valve
3. Adequate exposure protection (wetsuit)
4. Buoyancy control device (BCD) with tank mount and low pressure inflator
5. Quick release weight system and weights (If required)
6. Primary regulator and alternate air source
7. Submersible pressure gauge
8. Depth monitoring device (Depth gauge)
9. Time monitoring device (Watch)
10. Dive tables or required table information transcribed to slate
11. Compass
12. Computer (replaces 7, 8, 9, 10 & 11 depending on computer functions)
13. Cutting device (knife, line cutter or shears)
14. Surface marker buoy (SMB)
15. Audible emergency surface signaling device (whistle or air horn)
